

REMARKS

The specification has been amended to claim the benefit of prior applications. The specification has also been amended to correct an obvious clerical error. "Di" in N(di-C₁₋₄alkyl)₂ is superfluous in view of subscript 2 after the parentheses.

The claims have been amended to delete therefrom subject matter of allowed claims of prior Application No. 10/007,368 filed November 5, 2001, to correct the clerical error corrected in the specification, to eliminate multiple dependency of claim 5, and cancel claim 8 (which does not conform to U.S. practice).

Respectfully submitted,

Novartis
